📍 Vicente Lopez, Argentina

PROJECTS

I did some jobs as a freelancer, in one of those I made a page for a university with a team, the page included a chat and a forum. Another was an E-commerce for a artisanal ceramic shop. The last of the most important jobs I did was a functional auctions page where people could post the item they wanted to sell and other users could post how much they wanted to pay.

PROFILE

I'm a student of system engineering
I'm a team player, proactive and ready to learn something new every day

I have knowledge in development with Python
(Web development, Data scrapping,
Game development and IA)

EDUCATION HISTORY

UNICEN/Universidad de Buenos Aires - System engineering	2020 – present day
--	-----------------------

Angela Yu - 100 days of codeThe complete Python Bootcamp	2020
---	------

Angela Yu - Bootcamp Web development	2021
---	------

KEY SKILLS

- **Communication skills**
- **Experience with HTML, CSS, JS, Bootstrap, Tailwind**
- **Great knowledge with Python and Django**
- **Knowledge of React.js, API, Linux, pandas, Selenium, SQL**
